Considered by us the most important event of its kind we have ever announced—come and see if you don't think so too.

—We're afraid we can't do full justice to these splendid ribbons without being accused of exaggeration—but you'll pardon a little enthusiasm when you see them. We can't remember of having put on sale a better lot. The designers surely have been inspired to be able to produce such beautiful creations.—An event that is worth the attention of every woman who has a ribbon need—in fact, the saving will pay you to look far into your future needs, while the purchase is a large one—early selection is advisable.

—Remember this it is to be a great ribbon season—ribbon designs and colorings haven't been so varied for many a season. Lots include beautiful combination stripe and floral effects, gold and colored brocaded novelties, plaids, Roman stripes, Persian designs, dresdens and more effects. Ribbons up to 9 inches wide. New arrivals and not ribbons from our regular stock, but new advance novelties, on sale for the first time tomorrow—COME—

Happy Springtime is Mirrored in the Women's Wear Department

—With each new morning comes more fresh, distinctive, up-to-the-hour spring apparel for women. Almost every train brings more of the new-born season's brightest conceptions in women's Suits, Coats, Dresses, Skirts, Blouses and millinery for wear during the months of budding spring—Those who delight in new things will enjoy seeing and availing themselves of these early arrivals while they're still supremely new—we are ready with the finest selection of garments we have ever presented—showing the radical changes in fashion with a wonderful variety both of styles and prices.

Specializing on SUITS priced at

—We have set out with the determination to sell the best spring suit in the city for \$25—and we honestly believe we have achieved our aim in this remarkable group of unusually high grade garments. The assortment is greatly varied including materials of French Serges, Fine Gabardines, Wool Poplins, Shepherd Checks and Taffeta Silks—black and colors navy, Copenhagen, tan, olive, Nile and lead grey; leathers, silks, braids and art buttons extensively used.

C-H-E-C-K-S more popular than ever

—The great vogue for shepherd checks finds us splendidly ready to meet your every requirement. An exceptional showing that combines style and economy in an unusual degree. —Smart dressy concoits trimmed with genuine leather collars, bright colored silks, novelty buttons, broadcloth, etc. The jaunty flaring coats, the full sleeves—the wide flaring skirts and the new shirred effects are some of the characteristic features. If you want the smartest thing of the season choose one of these checks and you will have it. —Prices range at \$12.50, \$15, \$17.50, \$20 and up to \$35.

This Machine \$15.

Victrolas at \$15 and up—Easy Terms if desired
March Records are in—come and hear them

only the Victrola brings you the actual living voices of such famous singers as Caruso, Farrar, Gluck, McCormack, Melba, and Schumann Heink. Only the Victrola brings you the superb art of such noted instrumentalists as Eiman, Kreisler, and Paderewski. Only the Victrola brings you such celebrated musical organizations as Sousa's Band, Pryor's Band, Vessella's Band, and Victor Herbert's Orchestra. Only the Victrola brings you such leading comedians as Harry Lauder, Nora Bayes, De Wolf Hopper, and Raymond Hitchcock. It's wonderful array of famous artists make the Victrola a delight at all times and for every occasion.

To see the fetching new styles in S-K-I-R-T-S is to admire them

Regular values up to \$3.50 sale prices \$1.20 to \$2.25

Untrimmed Shape Special New Styles \$1.95

—These are exceptional values, black and colors in both close fitting turbans and sailor shapes. A very little trimming will convert any one of them into a smart hat, such as every woman needs right now to replace her winter-worn one. Milan braids, hemp and milan hemp, wide assortment on sale in millinery section, Monday, your choice \$1.95

Special lot of Millinery Flowers on sale Monday at

25c

—To many who find so much pleasure and profit in planning and making their own hat this event offers a money saving opportunity. Lot includes large roses with cluster leaves, rose buds, etc. priced for Monday25c

For the woman who has a new Hat to buy and \$3.95 or \$4.95 to spend

—A practical demonstration in value-giving and millinery beauty—and they're priced for the practical woman who regards a dollar saved as a dollar earned. By all means see them. The season's newest shapes and effects. Ribbons and flowers are plentifully used with charming results—arrange in one lot for Monday in our millinery section.

A very important clean-up Sale on good corsets

—Good desirable models widely varied in assortment to meet most every need—These numbers have been discontinued by us—yet this in no way effects the wear—the fit—or their durability.

—Warner's No. 250, \$3.50 Values at \$2.95
—Modart No. 641 \$3.50 Values at \$2.95
—Warner's No. 2KB3 and 2c43 \$2.50 values on sale at \$2.10
—Warner's No. 620, \$2 values at \$1.60
—Odd lot of front lace Modart Corsets in sizes 22 to 30, \$5 values at \$3.50

YAVAPAI'S OLD WORKINGS YIELD

(Continued from page 1)

for a period of three years under the Getchell regime. During that time an average of \$3,000 worth of bullion per month has been reclaimed in the company's 60-ton mill, and dividends paid totaling \$15,000. In past days the property produced approximately \$500,000 worth of ore. Values prevail in gold, silver, copper, lead and zinc, and average \$25.25 per ton in gold, silver and lead. Getchell estimates he has about 700,000 tons or ore in sight.

A Merger Effected.

Getchell recently returned from New York City, where he closed a deal for the consolidation of the Cash and Storm Cloud estates. The merger is most desirable from an economic standpoint, as the two properties can readily be worked by means of a single shaft and the efficient plant of machinery owned by the Cash people. The Storm Cloud is being developed by two tunnels and is said to have a large tonnage of gold-silver-copper-lead ore in sight. As soon as the merger plans are completed the Storm Cloud ore is to be treated in the Cash mill. The latter is to be increased in capacity to 150 tons.

A Trio of Coppers.

In the Copper Basin, about 12 miles from Prescott, the Commercial Mining company is shipping 100 tons of copper ore per day. Nearby, is located the property of the Loma Prieta

company, an enterprise in which John Livesey, former owner of the Colonel Sellers mine at Leadville, Colorado, is heavily interested. The Loma Prieta ore body is rich in chalcopyrite and is being developed into one of exceptional value and ore-yielding possibilities. One mile south of the Loma Prieta is located the 320-acre estate of the Lucy Five Mining company. Chicago and local capital is back of the enterprise. The ore is a copper pyrite and is particularly desirable as a flux. Development work is being prosecuted with a view to the shipment of ore in the near future.

A Shipment Planned.

John J. Jackson, who is in charge of operations on the Copper Hill group adjoining the Commercial mine, states he will begin shipping ore to the Hayden smelter as soon as freight arrangements can be made. The initial shipment will consist of 200 tons of copper oxides carrying a profitable gold content. Other shipments will follow at regular intervals. There is a considerable tonnage in sight in near-surface workings.

Gold-Silver Group.

Over in the Crown King country development work is being prosecuted in a number of old-time producers with gratifying results. Prominent among them is the Crown King mine, with a dividend record of \$400,000; the Tip Top mine, under option to Charles Schwab because of its tungsten-yielding possibilities; the Oro Belle, under lease to Bradshaw and Riggs, former mine operators in Nevada and Colorado; the War Eagle

Gladiator, owned by T. G. Norris and Lester Jackson of Prescott—production record of half million dollars—and the Nelson property. The latter has an ore body from three to five feet wide which samples from \$35.00 to \$40.00 per ton in gold. In addition it carries a silver-lead-zinc content. Shipments of the lower grade ores are being made to the Crown King mill, recently taken over by Randolph and Gemmill, both of whom have operated successfully in the mining districts of Nevada and Colorado. The high grade ores are being sent to the Humboldt smelter.

A Valuable Lease.

Operations were recently resumed on the Midday group, adjoining the old Peck mine. The Peck is one of the famous silver mines of a former generation and has an output record of \$3,000,000 worth of bullion. The Midday mine also is a producer of former years. It is now being operated under lease with a view ulte as much to its tungsten-yielding possibilities as to its known value as producer of silver. As a matter of fact, tungsten at \$65 per unit—that being the price paid for tungsten ore shipped from the Peck section to Pittsburg, Pa.—is more valuable than is silver at its present price per ounce.

A Deal in Zinc.

Zinc concentrates are being freighted to Prescott for shipment from the Ruth mine on Indian creek. The batch totals 200 tons and is going forward to smelter at Joylin, Missouri. Gold and silver concentrates, totaling 100 tons, are freighted from the Ruth to the R. H. Hetherington joins the Blue Bell mine on the north

metallurgical plant in this city.

A Camp Established.

Development of the Black Chief copper mine in the southern part of Yavapai county has been resumed under conditions that assure an immediate output of commercial grade copper. Superintendent McLane has purchased the necessary mine materials and supplies in this city and has established a camp at the property. Development is to be energetic and will be furthered by a large force of miners.

A 150-Ton Milling Plant.

Louis Goldman of Paris, Texas, vice-president of the Copper Queen Gold Mining company, accompanied by Texas stockholders of the corporation to the number of fourteen, recently visited the estate and closed the final details whereby his company, in conjunction with the Stoddard Mines company, will erect a 150-ton mill for the reduction of ores from both estates. The mill will be of latest patterns and will be equipped with the oil-rotation process. Preliminary work has been started at the millsite. It is hoped to have the plant in operation within five months from March 1st. It will be utilized solely for the reduction of the copper-gold-silver ores that prevail in large tonnage on the Copper Queen estate, and in lesser degree on the Stoddard ground.

A Rejuvenated Mine.

After an idleness of more than seven years operations are to be immediately resumed in the workings of the similar work will be done. The new shaft will be equipped with an air-compressor, drills, electric hoist, etc.

and prior to 1907, presented equal ore-yielding opportunities. In that year of panic and unstable financial conditions, however, the operators of the May were forced to close down the mine. The Blue Bell people, to the contrary, were able to continue operations, and to good purpose, for the mine is producing high grade ore to a depth of 500 feet and has for a long time been a steady and consistent shipper. The Ohio people behind the May company, encouraged by the splendid future of the Blue Bell mine, and the probability of the same rich ore body prevailing in the May workings, have decided to resume operations. As a means to that end electrical machinery has been purchased for the mine. The Blue Bell and May are located in the Mayer section.

A Bond on Lincoln.

D. H. Bradley, Jr., a former operator of mines in Parral and other sections of Mexico, has taken over the famous Lincoln mine under bond and lease. Philadelphia capital is interested in the project with Mr. Bradley. A force of twenty men is repairing the road to the mine and cleaning out the old drifts and stopes, for the purpose of inspection. A new working shaft is to be sunk at a central point in the large ore shoot exposed in the old workings, the first objective being a depth of 300 feet. At that depth the shoot is to be opened and ore blocked out. At the same time the shaft will be sunk to the 400-foot point, where the similar work will be done. The new shaft will be equipped with an air-compressor, drills, electric hoist, etc.

The machinery is en route to the mine.

A Bit of History.

Development of this ore shoot, as outlined by Bradley, will doubtless result in the resumption of ore shipments from this famous old producer. In former years the Lincoln was the pride of the Bradshaw mountains and outproduced better than \$500,000 worth of high grade ore. In due course, however, the ore, at depth, became what is termed "refractory." Thereafter, operations became desultory, and finally ceased. The suspension was not due, however, to any lack of gold in the ore, but solely to the fact that the reduction processes of that era could not reclaim the values after the ore became base. The records show that the last dozen shipments made by the former operators had an average value of \$83.00 gold per ton. Bradley will treat the ore in a 15-stamp mill near the shaft. This mill was recently modernized and supplied with the old flotation process.

When to Take Chamberlain's Tablets.

When you feel dull and stupid after eating.
When constipated or bilious.
When you have a sick headache.
When you have a sour stomach.
When you belch after eating.
When you have indigestion.
When nervous or despondent.
When you have no relish for your meals.
When your liver is torpid.
Obtainable everywhere.
